CA300 Universal

Lifestyle Slings

MANUFACTURED IN GREAT BRITAIN BY CARE-ABILITY HEALTHCARE.

All our slings are designed and manufactured in-house using the best technology and materials available plus using the skills and knowledge of Health Care Professionals.

A wide range of standard sizes and choice of loop or clip fastening.

More information and product video - www.care-ability.co.uk
1. Ensure that the guiding handles and identification label are on the outside.

2. The Sling should be centred and aligned with the user’s back.

3. Place the sling down the back of the client using the rear pocket. Ensure the aperture is tucked under the client’s coccyx.

4. Straighten the leg section. Push the side of the aperture underneath the client’s hip. Repeat on the opposite side. Kneeling in front of the client, pull each leg towards you in turn until all of the slack is taken up.
5 Carefully feed the legs of the sling underneath pushing the sling section down into the seating surface to avoid friction and shear against the clients legs.

6 Ensure the leg sections are equal in length and no twists or kinks are present. Feed one leg strap through the other.

7 The loop selection of each strap should be in accordance to a moving handling plan written by a competent person. Lifting straps can contain differing quantities of loops, the loop closest to the body of the sling will always be identified as number 1.

8 Attach straps to the spreader bar.

WASHING INSTRUCTIONS
Each sling can be laundered up to 80°C using a mild soap solution and then rinse. Slings will air dry quickly in a warm room or in the normal manner. Tumble dry on low setting only. Do not place over a convective heater or steam pipes. Do not use Biological detergents. Do not use Bleach. Do not use strong chemicals. A faded label is an early indicator that sling is subject to harsh /abrasive cleaning methods do not continue to use sling. All slings fitted with a Velcro body belt should have the Velcro square removed during laundering and refitted afterwards. This will significantly extend the lifespan of the product.

SAFE WORKING LOAD
Spacer - 300kg | Poly - 400kg | Mesh 300kg | Parachute 200kg

SLING INSPECTION
Each product should be inspected prior to each use and with your six month or annual hoist inspection. This is in line with LOLER (Lifting Operations and Lifting Equipment Regulations)

SAFETY AND QUALITY STANDARDS
Care-ability Healthcare (manufacturer), are registered with the Medicines and Health Care Regulatory Agency of the UK Government to manufacture Class 1 Medical Devices. Our products are categorised as a Class 1 Medical Device and carry the CE mark under the European Medical Device Directive EU93-42. The products are designed and manufactured under the externally accredited BS EN ISO 9001:2008 quality system well beyond the requirements of BS EN 10535:2006, The Hoist and Sling Standard. All of our products are thoroughly inspected by two staff members prior to the product being despatched. Our Lifestyle slings is labelled with a unique serial number to assist with trace ability and for recording LOLER examinations.
